

Physical Therapist Assistant Program

September, 2022

Program Updates

The fall semester at Nebraska Methodist College is off to a great start! We are excited to welcome the largest incoming cohort of students into our PTA Program since the start of COVID-19. They are all on campus this semester, getting to know each other and building their knowledge and skills.

Welcome to the NMC PTA
Program Incoming Class of
2024!

Student Involvement

NMC PTA students focus on volunteering in the community and fundraising for the future. This last year, we were able to provide free 10-minute massages for the teachers at a local elementary school. Teachers are extremely important to our world and we just wanted to help say thank you by giving massages for a couple of hours over the span of three days. We also volunteered to help one of our professors with a volleyball tournament this summer to raise money for adaptive bikes for children in the community.

Our fundraising efforts included giving \$5 massages to students and staff at Nebraska Methodist College during the weeks leading up to finals week. We also partnered with Chipotle to receive part of their sales for a night, which they donated to our PTA Program.

Working towards becoming future PTA's, volunteering and fundraising are really important to us. All of us chose to pursue this career because we want to be able to help others. Volunteering allows us to demonstrate our values of caring and compassion. Fundraising helps us afford APTA memberships, a PTA Board Exam prep class, and activities or conferences that will make us better healthcare professionals.

Respectfully submitted by Taegan Stewart, SPTA

Methodist Allied Health Student Association-PTA President
